

Snow

Thursday, February 18, 2021

Today's weather forecast calls for snowfall to diminish between 4pm and 5pm, with much lighter snowfall during the overnight hours. Our roadways and parking plazas were pre-treated with a liquid brine to help with today's snow removal. Our walkway contractor is scheduled to begin clean up around 4 pm in addition to our maintenance crew clearing roadways and parking plazas. We will keep you updated if conditions change.

Be safe and have a great day!
