

Condo 1 Residents:

National Grid is beginning to connect the new gas lines from the parking lots to the units. The parking plazas that will be upgraded are:

PP 18 to PP 13 - all units

PP 12 - units on the left (south side) of the Parking Plaza

PP 11 and 10 – the units closest to Birchwood Rd.

This upgrade will require the pilot lights for the furnace and the gas stoves to be relit and checked by National Grid vendor Asplundh.

The vendor will be contacting you directly with the date they will need access to your unit. The Condo Board is not involved in the scheduling process. If you have any questions, please call Antonio Fiore at 516-315-1432.

Units from PP 1 to PP 9 will not be upgraded until later this year or next year.
