

## Attention Condo 2 Residents- Important Information Regarding National Grid Upgrade and Installation

National Grid will begin with Phase 3 of their Natural Gas pipeline upgrade next week. This phase of the project will include the installation of new service lines from the main gas line to your meter. *Please understand that this upgrade is mandated by the New York State Public Service Commission to the utility.*

National Grid will be notifying/contacting residents regarding their scheduled installation date. On the day of installation, utility crews must have access to your unit to inspect inside gas lines after new service lines are tied-in and energized.

All questions regarding scheduling should be directed to the National Grid contact info listed in their letter (see below).

The condo Boards will have no involvement in the scheduling process and it will be the sole responsibility of National Grid.

Dear current National Grid customer,

Energy plays a critical role in our day-to-day lives and ensures the well-being of our community. National Grid is mandated by the New York State Public Service Commission to upgrade the natural gas infrastructure in your area which supplies natural gas to your home. In order for us to complete this work, we may need to replace your service line and will need access to the gas meter in your home as well as all of your gas appliances.

You will experience a temporary interruption of natural gas service on the day that the crew works to connect your home to the new main. Visit [ngrid.com/service\\_line](http://ngrid.com/service_line) to view an example of this process.

As part of this upgrade, National Grid is seeking to relocate the gas meter outside where practical.

**There is no charge for the service upgrade or meter relocation.**

If we do not hear from you, we will be forced to begin work on our gas service pipe; as a result, gas service may be temporarily interrupted until we have been provided access to complete the required work.

To avoid this inconvenience, please schedule an appointment with us/our contractor **Antonio Fiore** at **516-315-1432** Office hours: Monday - Friday between 8 a.m. and 5 p.m.

**We are here for you to answer any questions about the project.**

Thank you in advance for your cooperation.

Sincerely,  
Gas Construction

**nationalgrid**

HERE WITH YOU. HERE FOR YOU.
